

FE25 / **FE**50

The FE25 / FE50 is a two-stage, spring loaded lever operated gas pressure regulator by Pietro Fiorentini. It is particularly suitable for low pressure natural gas distribution systems for residential and commercial users. It should be used with previously filtered noncorrosive gases including biomethane and natural gas blended with hydrogen. According to the International Standard ISO 23555-2 and European Standard EN 334, it is classified as Fail Close because it is always supplied with an overpressure protection device (slam shut valve). The FE25 / FE50 is **Hydrogen Ready** for NG-H2 blending.

Residential users

Features	Values	
Design pressure* (PS¹ / DP²)	up to 860 kPa up to 125 psig	
	Standard version	Arctic version
Ambient temperature* (TS1)**	-30°C to +65°C -20°F to +150°F	-40°C to +65°C -40°F to +150°F
Inlet gas temperature*,***	-20°C to +65°C -4°F to +150°F	-30°C to +65°C -20°F to +150°F
Inlet pressure (MAOP / p _{umax} 1)	from 10 kPa to 0.86 MPa from 1.45 psig to 125 psig	
	BP version	MP version
Range of downstream pressure Wds	from 1.3 kPa to 18 kPa from 5.2"w.c. to 2.6 psig	from 30 kPa to 40 kPa from 4.35 psig to 5.8 psig
Range of downstream pressure Wdso	from 3.5 kPa to 24.1 kPa from 14"w.c. to 3.5 psig	from 30 kPa to 80 kPa from 4.3 psig to 11.6 psig
Minimum inlet pressure and nominal capacity	FE25: up to 25 Sm³/h 875 sfch with 28 kPa 4 psig differential pressure FE 50: up to 43 Sm³/h 1,500 sfch with 69 kPa 10 psig differential pressure	
Accuracy class (AC1)	10	
Lock-up pressure class (SG1)	20, minimum 0.75 kPa 3" w.c.	
Connections*	In-line 3/4" or 1" NPT according to ANSI B1.20.1, other configurations or connections on request	

Table 1 Features

^(*) NOTE: Different functional features and/or extended temperature ranges may be available on request. Stated inlet gas temperature range is the maximum for which the equipment's full performance, including accuracy is guaranteed. Product may have a different pressure or temperature ranges according to the version and/or installed accessories.

^(**) NOTE: Stated temperature range is the operating range for which the equipment's mechanical resistance and leakage rate are guaranteed. Some body materials, if multiple choices are available, may not be suitable for all the available versions shown.

^{*)} NOTE: Stated temperature range is the range for which the equipment's full performance, including accuracy and lock-up are guaranteed. Some body

Materials and Approvals

Part	Material
Body	Aluminum
Cover	Aluminum
Diaphragms and seats	Nitrile rubber for BP version Rubberized fabric for MP version
Sealing rings	Nitrile

NOTE: The materials indicated above refer to the standard models. Different materials can be provided according to specific needs.

Table 2 Materials

Construction Standards and Approvals

The FE25 / FE50 regulator is designed according to the Internation standard ISO 23555-2, European standard EN 16129, Italian Standard UNI 11655, ANSI B109.4, CSA 6.18 and ANSI Z21.80. The FE25 / FE50 BP versions are CSA certified.

ANSI Z21.80 certification is limited to 70 kPa | 10 psig maximum inlet pressure. Leakage class: bubble tight, better than class VIII according to ANSI/FCI 70-3.

UNI 11655

ANSI B109.4

CSA 6.18

ANSI Z21.80

ISO 23555-2

FE25 / FE50 competitive advantages

Operates with low differential pressure

Slam shut for overpressure

Two-stage double diaphragm and single orifice regulator

Highly customizable

Suitable for 1 ft clearance installation with 2.5 cf/h limited venting

Built-in thermal valve option

Built-in strainer

Built-in flow limiter valve option which enable UPSO feature

Suitable for outdoor installations

fio.westvirginia@fiorentini.com

Biomethane (RNG) compatible and 20% Hydrogen blending compatible. Higher blending available on request
